Ctrl + Shift + J	Incremental Find reverse
	Change the encoding to ISO-8859-1
Ctrl + V	Paste from the clipboard
Ctrl + I	Quick Fix
Ctrl + Y	Redo the last operation
Alt + Shift + ↓	Restore Last Selection
	Revert to the state after the most recent save operation
Ctrl + A	Select All
Alt + Shift + ↑	Expand selection to include enclosing element
Alt + Shift + →	Expand selection to include next sibling
Alt + Shift + ←	Expand selection to include previous sibling
	Shift a block of text to the left
	Shift a block of text to the right
F2	Show tooltip/javadoc description for the element at the cursor
	Change the encoding to the system encoding
Ctrl + Z	Undo the last operation
	Change the encoding to US ASCII
	Change the encoding to UTF-16BE
	Change the encoding to UTF-16
	Change the encoding to UTF-16LE
	Change the encoding to UTF-8

**Help**

	Open the about dialog
	Open the tips and tricks help page
	Open a welcome page

**File**

Ctrl + F4	Close the active editor
Ctrl + Shift + F4	Close all editors
	Move the selected item
Ctrl + N	Open the New item wizard
Ctrl + P	Print
Alt + Enter	Display the properties of the selected item
	Refresh the selected item
	Rename the selected item
	Revert to the last saved state
Ctrl + S	Save the current contents
Ctrl + Shift + S	Save all current contents

**Navigate**

	Navigate back
Alt + ←	Move backward in the editor navigation history
	Navigate forward
Alt + →	Move forward in the editor navigation history
	Navigate into the selected item
Ctrl + Q	Go to last edit location
Ctrl + L	Go to Line
Ctrl + Shift + P	Moves the cursor to the matching bracket
Ctrl + Shift + ↓	Go to Next Member
	Go to next problem
Ctrl + Shift + ↑	Go to Previous Member
	Go to Previous Problem
	Go to Resource in the active view
Ctrl + .	Navigate to the next item
Ctrl + Alt + H	Open Call Hierarchy
F3	Open Declaration (Open an editor on the selected element)
Shift + F2	Open External Javadoc
Alt + F3	Opens an implementation of a method call on an interface
Ctrl + Alt + F3	Opens an interface declaration of a method call
	Opens an editor on a particular resource
Ctrl + F3	Show the structure of the selected element
	Open the Implementation in the Super Type
Ctrl + Shift + T	Open a type in a Java editor
F4	Open a type hierarchy on the selected element
Ctrl + Shift + H	Open a type in the type hierarchy view
Ctrl + ,	Navigate to the previous item
	Show in Package Explorer
Ctrl + O	Show Outline
	Up (Navigate up one level)

**Project**

Ctrl + B	Build all projects
	Build the selected project
	Close the selected project
	Generate Javadoc
	Open a project
	Display the properties of the selected item's project
	Rebuild all projects
	Rebuild the selected projects

**Refactoring**

	Change Method Signature
	Convert Anonymous Class to Nested
	Convert Local Variable to Field
	Convert Nested Type to Top Level
	Encapsulate Field (Create getting and setting methods)
	Extracts a constant into a new static field
	Extract a set of members into a new interface
Alt + Shift + L	Extracts an expression into a new local variable
Alt + Shift + M	Extracts a set of statements or an expression into a new method
Alt + Shift + I	Inline a constant, local variable or method
Alt + Shift + V	Move – Refactoring
	Pull Up (Move members to a superclass)
	Push Down (Move members to subclasses)
Alt + Shift + Y	Redo – Refactoring
Alt + Shift + R	Rename – Refactoring
Alt + Shift + Z	Undo – Refactoring
	Use Supertype Where Possible (Re-route)

**Run/Debug**

Ctrl + Shift + B	Add/Remove Breakpoint
	Add/Remove Method Breakpoint
	Add/Remove Watchpoint
	Add Java Exception Breakpoint
	Debug...
F11	Debug Last Launched
Ctrl + D	Display result of evaluating selected text
Ctrl + U	Execute: evaluate selected text
	Inspect result of evaluating selected text
F8	Resume
	Run ...
Ctrl + F11	Run Last Launched
	Run Last Launched External Tool
Ctrl + R	Run to Line
F5	Step Into

**Run/Debug**

Ctrl + F5 Step Into Selection  
F6 Step over  
F7 Step Return  
Shift + F5 Step with filters  
Suspend  
Terminate
